

PROBABILITY AND STATISTICS – PROBLEM SET 6

1. If $Z \sim N(0, 1)$, compute
 - (a) $P[Z < 1]$
 - (b) $P[Z < 2.4]$
 - (c) $P[1 < Z < 2.4]$
 - (d) $P[Z < -1]$
 - (e) $P[-2.4 < Z < 1]$.
 - (f) $P[|Z| > 1]$
2. If $X \sim N(175, 25)$, compute
 - (a) $P[X < 200]$
 - (b) $P[X < 235]$
 - (c) $P[200 < X < 235]$
 - (d) $P[X < 150]$
 - (e) $P[115 < X < 200]$.
3. In a normal distribution, 31% of the observations are under 45 and 8% are over 64. Find the mean and standard deviation.
4. In a normal distribution, 7% of the observations are under 35 and 89% are under 63. Find the mean and standard deviation.
5. Suppose that the life lengths of two electronic devices D_1 and D_2 have distributions $N(40, 36)$ and $N(45, 9)$ respectively. If the device is to be used for a 48 hour period, which device is to be preferred?
6. Suppose that the scores of an examination are normally distributed with mean 76 and standard deviation 15. The top 15% scores receive grade A and the bottom 10% receive grade F. Find
 - (a) the minimum score to receive an A
 - (b) the minimum score to pass.
7. Suppose that the heights of 800 students are normally distributed with mean 66" inches and standard deviation 5". Find the number of students with heights
 - (a) between 65" and 70"
 - (b) greater than or equal to 6'.
8. In a certain examination, the percentages of candidates passing and getting distinction were 45 and 9 respectively. Assuming that the marks are normally distributed, determine the average marks obtained by a candidate if the minimum marks for passing and distinction are 40 and 75 respectively.

Cumulative Standardized Normal Distribution

$A(z)$ is the integral of the standardized normal distribution from $-\infty$ to z (in other words, the area under the curve to the left of z). It gives the probability of a normal random variable not being more than z standard deviations above its mean. Values of z of particular importance:

z	$A(z)$	
1.645	0.9500	Lower limit of right 5% tail
1.960	0.9750	Lower limit of right 2.5% tail
2.326	0.9900	Lower limit of right 1% tail
2.576	0.9950	Lower limit of right 0.5% tail
3.090	0.9990	Lower limit of right 0.1% tail
3.291	0.9995	Lower limit of right 0.05% tail

z	0.00	0.01	0.02	0.03	0.04	0.05	0.06	0.07	0.08	0.09
